

Men Groomer Lady
Double-Head Electric Shaver

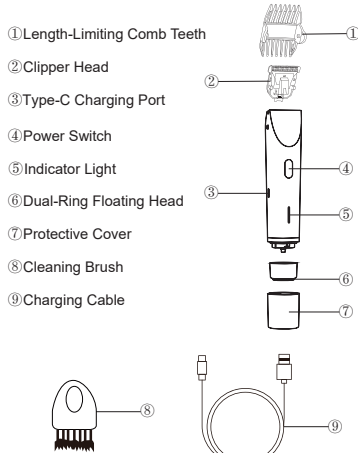

BZ-236L

Please read the user manual carefully before using

►Product Introduction

Thank you for choosing our company's dual-head electric hair trimmer. This product features a unique design, with one end equipped with a clipper head specially designed for smoothly trimming long hair, and the other end fitted with a floating dual-ring round head, capable of closely adhering to the skin to efficiently remove short hair. It adopts an innovative design with dual heads and dual motors, offers 7-level waterproof functionality, and operates safely and quietly, providing a novel experience for your personal grooming.

►Component Description

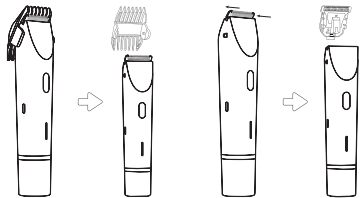

Note: This product contains a built-in lithium battery. Please be sure to operate in accordance with the instructions provided in the manual.

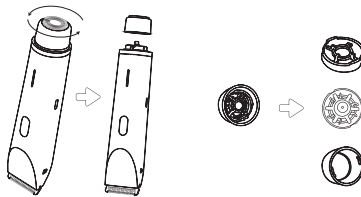

1

►Component Disassembly Instructions

The following illustrations and text are intended as a guide for operations:

- 1.Remove the limit comb**
Slide the side of the comb teeth to loosen and then remove the limit comb.
- 2.Remove the clipper blade head**
Push the blade teeth backwards, loosen and then remove the clipper blade head.

- 3. Remove the rotary blade head**
Twist the rotary blade head counter clock wise until it loosens, then remove it.
- 4.Remove the rotary blade and screen**
Twist the four pillars on the white fixing part inside the blade head. Once loosened, remove the fixing part, blade, and screen.

Keep away from corrosive liquids.

Store the product out of reach of children.

⚠ Please do not leave the product unattended when it is in operation.

⚠ Do not attempt to disassemble the main unit yourself.

4

►Guidance for Usage

Usage Instructions The following are illustrated instructions for using this device:

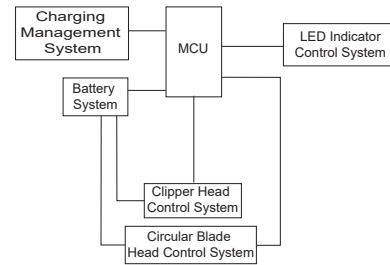

- 1.Press and hold the "On/Off" button for 2 seconds to select the clipper mode for trimming long hair.
- 2.Use the serrated clipper head against the direction of hair growth to trim longer hairs.
- 3.Press briefly once more to activate the round head shaving mode.
- 4.Use the dual-ring rotary head against the direction of hair growth, making circular motions to shave off short hairs.
- 5.After use, press and hold the "On/Off" button for 2 seconds to turn the device off.
- 6.Remove the used blade head to clean the hair from the storage area.

5

►Troubleshooting

Fault Symptom	Cause Analysis	Solutions
The main unit is not working (blue light turns on then off)	Overload causing the circuit system to protect and forcibly shut down	1.Reinstall the round head blade and check if the white fixture is installed backwards. 2. Remove the round head to see if there is any foreign object blocking the blade. 3.If the above attempts do not work, please contact after-sales service.
The main unit is not working (blue and red lights turn on then off)	Overload causing the circuit system to protect and forcibly shut down	1.Remove the clipper head to check if any foreign objects are jamming the blade. 2.If the above attempts do not work, please contact after-sales service.
The main unit is not working (no response)	Insufficient battery	1.Use after charging. 2.If the above attempts do not work, please contact after-sales service.
